- **Heater** for low temperature operation
- **Time Delay** to continue recording after bus is turned off
- **Ability to Display Bus Number**
- **One Channel Audio Recording**
- **LAN Connection** for downloading
- **Dimensions:** 7" long x 4" wide x 1-3/4" deep

OPERATING

- Event logging – the date and time is recorded onto the image (The system has a permanent battery to keep track of the date and time regardless of power supply)
- Playback – select date and time to be replayed (Has 2x, 4x, and 8x for playback speed)
- Controls can be password protected

POWER AND CAMERA CONNECTION

- DVR Voltage – 10 to 28 V DC
- Time delay that can keep the unit running after the vehicle has been turned off up to 60 minutes
- One wire connecting system
- Video and audio output jacks

RECORDING

- The system can be set to record at preset times or when unit is turned on
- You can record one channel, two channels, three channels, or all four channels
- Recording can only be stopped when password is entered
- Video quality may be set to maximize either recording time or the video resolution

CAMERA

- We offer a range of cameras that can be used with our system, with IR lighting and shatter-resistant domes.

DOWNLOAD

- Downloading can be done in one of two ways:
 - Data can be transferred to a VHS tape or downloaded to a CD-R/CD-RW
 - Data can be copied to a computer hard drive using the supplied software
- Data can be viewed remotely
- Data can be E-mailed
